

# SG2B is **hiring** developers to redefine the industry of energy planning tools

Everything started with a need identified 10 years ago and 2018 marks the launch of NIMBEE: A unique platform that; boosts DER planning, ensures a collaboration between partners and improves decision-making.

## The Company

The team has a *clear purpose* that guides it each day:

To **simplify energy-planning decisions** so that communities can transition to a carbon-free environment

How we differentiate

A passion to *inspire action* and create a greener world, drive us to work

### Strive for excellence:

Human beings are naturally looking for achievement. Excellence is not a skill, but an attitude. We aim to develop this best version of ourselves.

### Actors of change:

Every new day we get closer to our goal to create a carbon-free environment. Challenging the status quo is what defines us.

### Build upon each other:

Every employee has a strategic place in our team. We all know and appreciate each other's strength. This creates our strong work ethic.

What's in it for you?

## Every day, a new way to

- Tackle ambitious projects and discover new solutions to global challenges
- Leverage the newest and best big data technologies and build better outcomes every day
- Work on a unique energy-planning solution that has started its quest to transform communities

Job requirements

## Interested? But do you have what it takes?

- Minimum 2 years' experience in front-end development (Angular X)
- University degree in Computer Science or Computer Engineering, or a college diploma in Computer Science with pertinent experience
- JavaScript/Node.js, HTML 5/CSS 3, REST is essential
- Proven experience in designing user friendly, single page web applications

And while working for this higher, better cause, **SG2B offers you**

A Competitive salary, a work-family balance that adapts to your needs.

A young, dynamic work environment at the heart of the plateau
