

We develop your

# COMMUNITY ENERGY PLAN

## OUR OFFER

**Let's accelerate your transition to cleaner energy**

Get your energy and GHG emissions profile

Harness your local energy sources

Electrify your vehicles and your public transportations

## THE IMPACTS

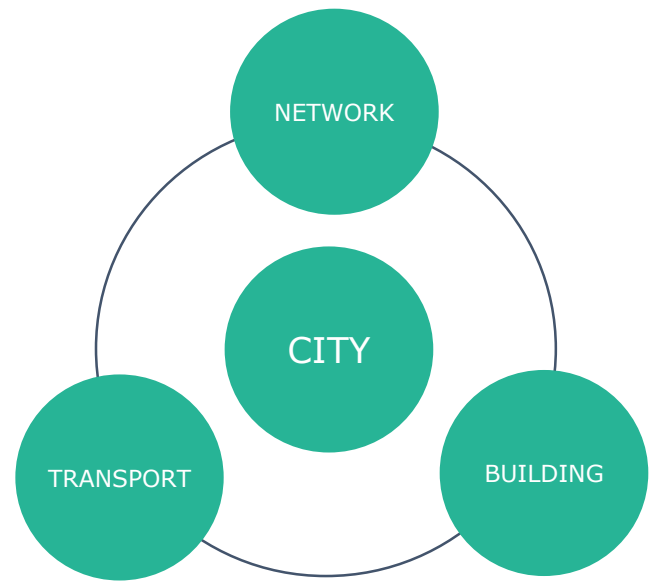

### **Green leadership in action**

- A business-oriented energy transition plan
- A path toward government funding application
- A communication tool with the population

## THE SG2B PLATFORM

# An integrated energy planning process

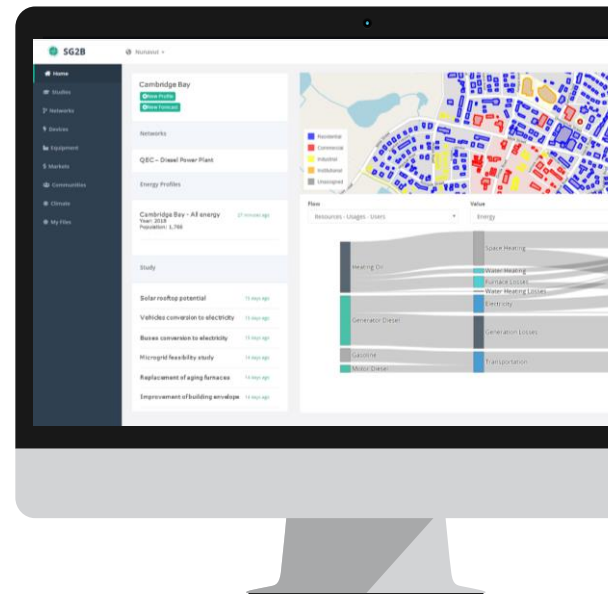

Modernize your buildings, your transports and your energy networks on the same platform.

## THE TECHNOLOGY

# A smart grid and smart city energy planning tool

- An open Geographical Information System
- An equipment and energy resources library
- Multivariable simulations over the long term
- New technologies impact on cost and GHG

## THE SG2B WAY

# A Turnkey solution

- Multi-user access to the platform
- Datasets ready for analysis
- Free technical support
